#### Read the following passage and answer the questions from SI no. 01-05

Nature was the worst enemy of man in the past. He lived under the continued threat of famine and other epidemics. A wet summer could bring death to whole nations, and every winter was a menace. Mountains stood like a barrier and sea was less a highway than an impassable division. Today nature, though still an enemy, is an enemy almost completely conquered. Modern transportation has made the resources of the entire planet accessible to all its inhabitants. Modern medicine and sanitation allow dense population to cover the ground without risk of pestilence. True, we are still at the mercy of the more violent nature convulsions. Against earthquake, flood and hurricane man has yet devised no adequate protection. But these major cataclysms are rare. At most times nature is no longer formidable, it has been subdued.
